

Nov 12

can you export to a .bib file from Zotero? Needed for thesis template.

Literature: Arnau et al 2012 seems like a good start

Ferron et al 2002

Lei, Lomax 2005

Vallejo et al 2008

Sources from text?

Pivot? Mediation

Lijuan (Peggy) Wang (Notre Dame)

Han Du (UCLA)

Qian Jackie Zhang (FSU)

Writing goals:

- describe what has been done before to "stress test" the mixed model

↳ synthesize!

- describe what you hope to do/explore

- what you plan to do

- why it is important/relevant/interesting

As you are reading, pay attention to...

- what assumptions are the authors making when they generate data?

↳ distributions, models, parameters, sample sizes, missingness, balance, etc., what are they evaluating

model parameter estimates?
bias? variance?

- what kind of gaps, if any, do you see (what questions arise and are maybe left unanswered?)

- what strikes you as interesting to explore further?

Writing feedback

- Pay careful attention to subscripts and punctuation in LaTeX equations

- Where are citations needed?

(More to come...)
